

Elite Cleaning and Disinfecting Solutions

with the Clorox® Total360® Electrostatic Spraying System

The Path to Peace of Mind

When you need peace of mind—whether for yourself, your employees, or your customers—we've got you covered. More and more businesses are recognizing the importance of cleaning for health and productivity, and understand the impact that employee absence due to illness has on their bottom line.

AMS has long understood how critical cleanliness and sanitation is at our customers' facilities and take our responsibility seriously. Our staff utilizes quality hospital-grade disinfectants, HEPA vacuums and provide continuous training to our teams on utilizing proper cleaning practices to avoid cross contamination.

In addition to traditional sanitizing services, we also are proud to offer the Clorox® Total 360® System for disinfection and sanitizing—a powerful tool in our arsenal against colds, flu and other germs.

Protecting Against COVID-19

In order to reduce the risk of exposure to COVID-19, for both your customers and your employees, the CDC recommends having a cleaning and disinfecting plan in place that can be implemented, maintained, and revised as needed.

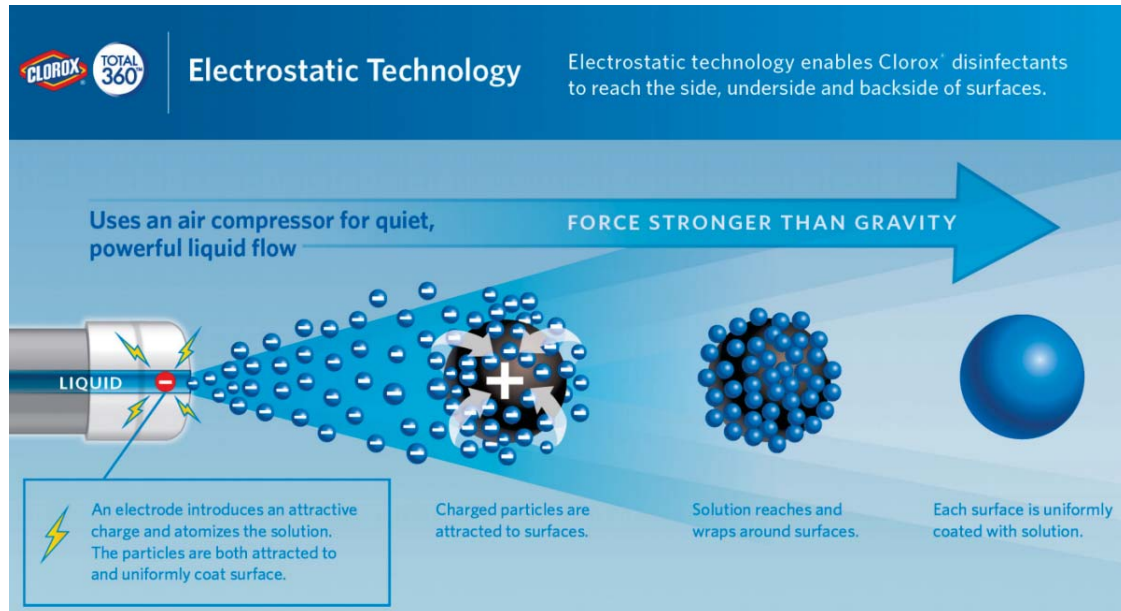

We're here to help.

COVID-19 can be killed if you use the right products. The CDC has compiled a list of disinfectant products that can be used in the fight against COVID-19, including ready-to-use sprays, concentrates, and wipes. This list includes Clorox® Total 360® Disinfectant Cleaner.

The Clorox® Total 360® System Electrostatic Sprayer technology allows for superior coverage of the Clorox® Total 360® Disinfectant Cleaner, using an electrostatic charge to apply the disinfectant to all sides, including the underside and backside of surfaces. This ensures that hard-to-reach—and often forgotten—surfaces are disinfected.

What is Electrostatic Spraying?

Unlike traditional hand sprayers, foggers and mops, the innovative Total 360® electrostatic sprayer—with the patented PowerWrap™ nozzle—delivers trusted Clorox solutions to the front, back and sides of surfaces, providing superior coverage for better germ protection.

This revolutionary system that helps reduce pathogens like never before! It pairs an innovative electrostatic sprayer with Total 360® Disinfectant Cleaner, Spore Defense™ Cleaner Disinfectant or Anywhere® Hard Surface Sanitizing Spray to deliver superior coverage in an efficient, cost-effective way.

Watch this video to learn more about the Clorox® Total 360® System process.

Total 360® Disinfectant Cleaner

The Clorox® Total 360® Disinfectant Cleaner is eligible for use against SARS-CoV-2, the virus that causes COVID-19, based on the EPA's Emerging Viral Pathogen Policy.

Total 360® Disinfectant Cleaner:

- Kills 99.9% of bacteria in 5 seconds
- 44 organism claims: Kills cold† and flu viruses, MRSA and norovirus in 2 minutes or less
- One-step disinfecting
- Eliminates odors
- Sanitizes soft surfaces

Ask about the Clorox® Anywhere® Hard Surface sanitizing spray, perfect for use in areas requiring a food-safe product—like kitchens and cafeterias—and the Clorox®, and Spore Defense™ Cleaner Disinfectant—perfect for hospitals, doctor's offices, and patient rooms. All three products that work with the Clorox® Total 360® System (Clorox® Total 360® Disinfectant Cleaner, Clorox® Anywhere®, and Spore Defense™) are all eligible for use against SARS-CoV-2, the virus that causes COVID-19, based on the EPA's Emerging Viral Pathogen Policy.

(EPA Reg. #67619-38)

‡ Rhinovirus

§ Obtained via surrogate

** Kills 99.9% of bacteria; sanitization claims are valid for all vegetative non-spore-forming bacteria

Benefits of On-going Disinfecting Services

There are two ways to integrate disinfecting into your cleaning and maintenance routine. The first is to implement it as needed—after an incident or during cold and flu season, while the second is to make it part of your regular cleaning routine.

The benefits of having regular disinfecting as part of your cleaning and maintenance program:

- Decreased cost
- No wait time
- Increased productivity

The CDC guidelines for disinfecting surfaces outlines two steps: first, a thorough cleaning followed by, second, a disinfection to kill germs, like viruses and bacteria. By making the Clorox®Total 360® System disinfection services part of your regularly scheduled cleaning it eliminates the need for an additional clean prior to disinfection. This not only decreases cost but prioritizes your needs in our schedules, meaning that you won't have to wait for availability because your disinfecting service is already on our schedule.

The Clorox®Total 360® System is proven to reduce absences.

In one case study completed at an elementary school, regular usage of the the Clorox®Total 360® System reduced the absenteeism rate by as much as 53% during the peak cold and flu month. If your staff is healthy—and not missing work or working through a cold—they can increase their focus and remain productive. It's especially essential during cold and flu season to help keep your

staff healthy and productive.

As an added bonus, your staff can share in your peace of mind knowing that you're doing whatever it takes to help keep them as healthy as possible in the workplace.
