Offset

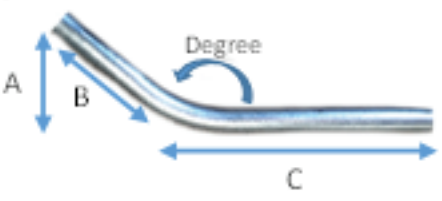

Conduit Size	A	B	C	D	Quantity

The diagram shows a pipe bent at an angle. Dimension A is the vertical offset height. Dimension B is the horizontal distance from the end of the pipe to the start of the bend. Dimension C is the total horizontal distance from the start of the bend to the end of the pipe. Dimension D is the horizontal distance from the end of the pipe to the start of the bend, which is equal to B.

Kicker

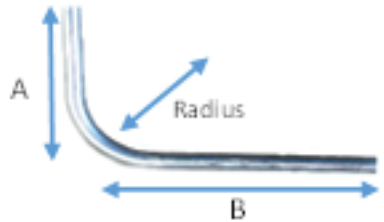

Conduit Size	A	B	C	Degree	Quantity

The diagram shows a pipe bent at an angle. Dimension A is the vertical height of the bend. Dimension B is the horizontal distance from the start of the bend to the end of the pipe. Dimension C is the total horizontal distance from the start of the bend to the end of the pipe. The angle of the bend is labeled as 'Degree'.

Stub-Up

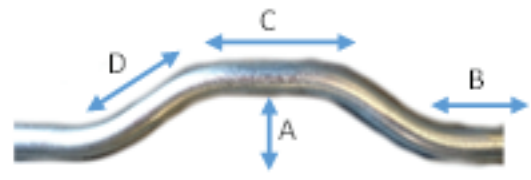

Conduit Size	A	B	R	Quantity

The diagram shows a pipe bent at a 90-degree angle. Dimension A is the vertical height of the bend. Dimension B is the horizontal distance from the start of the bend to the end of the pipe. The radius of the bend is labeled as 'Radius'.

Saddle

Conduit Size	A	B	C	D	Quantity

The diagram shows a pipe bent in a saddle shape. Dimension A is the vertical height of the bend. Dimension B is the horizontal distance from the end of the pipe to the start of the bend. Dimension C is the total horizontal distance from the start of the bend to the end of the pipe. Dimension D is the horizontal distance from the end of the pipe to the start of the bend.

**** Also Available Back to Back bends and Kickers with 90 degree bend ****
