

Due to the Coronavirus, we have most recently been and will continue to follow the guidelines as the Center of Disease Control and Prevention (CDC) has suggested on their website to the best of our ability so that we create a safe and clean environment for our patients and staff. The following are the steps we have taken:

When you arrive:

- Screening of all patients at arrival for patients that either have Coronavirus symptoms or have been in contact with someone that does. Some main symptoms include Fever, Coughing and Shortness of Breath. We ask that you please stay home if you present with these symptoms or have been in contact with someone that does.
- Limiting non-patient visitors. It is our suggestion to have any friends and family wait outside the facility so as to limit close contact with others within the facility.

More Frequent Cleaning:

- More frequent cleaning and sanitizing of high touch areas
- Daily deep cleaning and sanitizing of entire office
- Sanitizing all areas once a patient is finished with using it
- More sanitizer bottles and stations throughout the facility
- We have always been and will continue to use hospital grade germicidal cleaner

Other Precautions:

- We will observe social distancing within the facility and use of facemasks
- You might be asked if it is ok to perform more close contact skills prior to treatment like manual therapy and stretching.

Please know that the health and safety of our patients and staff are our main priority. Each day we review the CDC website, NYC Department of Health Website and Homeland Security website to get the most accurate information. We will remain open under normal operating hours until further notice to continue to serve the Bayside community.
