HAVE YOU SEEN US?

You can catch members of Crown Technology at many of the industry events. Members of the sales team recently attended the 2017 PWX Orlando show in August, as well as the October APWA Western Snow and Ice Conference, in Loveland, CO. On the schedule for early 2018 is the ATSSA Traffic Expo in San Antonio and the NPE in Cleveland OH. We look forward to visiting with our customers at all of these

Who Is Crown Technology In 2017?

In 1994, Donald Peek, an owner of a successful pavement marking company, and his partner, Louis McCosh used their vast experience in the striping business as an asset to produce one of the leading, fully automated, thermoplastic marking manufacturing companies - Crown Technology, LLC. In 1996, Woodbury, GA became home to Crown's facilities and has experienced several expansions to date to accommodate supply demands as well as Crown's efforts to bring innovative products to our industry. At Crown, there is a great emphasis placed on Research & Development providing our industry with new high quality materials in today's expanding and ever-changing market. Also, with Crown founded and having arisen from the work of experienced contractors, we offer a unique understanding of our customers needs. Our Sales and Technical staff have decades of industry experience and stand ready to assist our customers. In 2017, Crown continues to grow and expand in the industry with our accomplishments, customers, and the materials we offer.

OUR PRIDE, OUR PRODUCTS, & YOU!

Crown is growing, thanks to our customers continuous support and trust in our products. We currently offer an array of Thermoplastic pavement marking materials and specialty markings, including our Thermoplastic, Preformed Thermoplastic, Crown Cookies, and Intersection Grade Thermoplastic. We look forward to helping you with your future pavement marking needs.
