Overall Height	72 in.	74 in.	86 in.
Bottom Cone Slope	50 degree	40 degree	40 degree
Loaded Weight	1 Ton	1.4 Ton	2 Ton

The EZE-FEEDER is the convenient and efficient way to fill bunk feeders or range feed your livestock. Works with grain, pellets, cubes, screenings, and more.

The EZE-FEEDER's round design ensures no bridging for a clean-out on almost every type of feed. The 2-part epoxy coated interior meets food grade standards, protects the metal from high-salt supplements and is safe for all feeds

An unloading speed of 12.5 bu./ min. cuts down on chore time while remaining slow enough to get the feed where you want it.

The EZE-FEEDER can be mounted various ways including: pickup-up truck(includes short box), hydraulic deck, 3-point hitch, ATV, skid steer, bale prongs, and more.

Tell precisely how much feed you are feeding with the optional scale and digital read out. The optional mixing auger can be used for mixing supplements into your feed, or can also be used to mix and treat seed.

With many sizes and options available there is sure to be a model to fit your operation.

Options:

- 12 V or Hydraulic drive on discharge auger
- HD 3-point hitch (Category 2 or 3)
- 8" Vertical mixing auger (12 V or Hydraulic drive)
- 6,000 lb. scale with digital readout
- 12 V remote lid
- Trailer kit (2" ball or clevis hitch)
- Battery box and deep cycle battery

3-point hitch, category 2

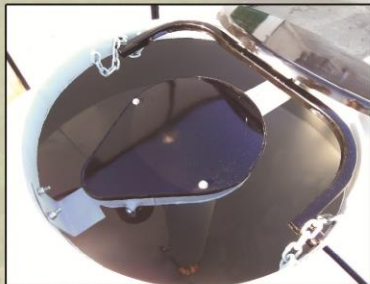

6,000 lb. scale with digital readout.
Save on feed cost by feeding precisely
how much your livestock needs.

Model 45 on trailer kit with 2" ball coupler,
jack and fenders

Model 70 with hydraulic discharge auger
and HD 3-point hitch

12 V vertical mixing auger

Model 95 with optional 12 V remote lid and
trailer kit

No more pails...

The improved lid opener keeps the lid low and provides a obstruction free opening for filling.

Model 45 in short box pick-up

Model 70 on HD 3-point frame
