

ARCO VISTA SIDE FOLDING DOOR

Available in solid aluminium; ultra-clear polycarbonate; mesh or 6.38mm laminated glass curtains. Finishes available in clear (natural) anodised or powder coat.

The Arco Vista Side Fold is produced to provide maximum vision with the use of glass or polycarbonate whilst providing security and protection against the elements. The Arco Vista is a great way to secure openings internally or externally with a more aesthetic style.

Applications

The custom-made Arco Vista is an aesthetically pleasing alternative for shopfronts as well as reception areas, canteens, Restaurants, Cafes and external applications including domestic use. The Arco Vista is ideal for when full walk through traffic is warranted. It also enables the use of infill alternatives for vision or airflow pending the desired application.

Specifications

The ARCO Vista can be manufactured up to a Maximum height of 4200mm with the width being endless. **For technical information refer to our technical sheet A3**

Curtain

The Arco Vista is constructed with extruded aluminium and a heavy durable hinge system with glass infills that interlock. Panel widths are custom made to size. The End posts or Intermediates are lockable to incorporate maximum security.

Operation

The Operation is by hand which requires the user to manoeuvre the door by pushing; pulling or feeding the doors into pockets or cupboards. Our high-grade bearing wheels and tracking ensure ease of operation with our Vista folding door.

Finish

Standard finish is Clear (natural) anodised but can be powder coated as an optional extra.

Locking

Standard locking includes a keyed mortice lock mounted at 900 high locking into holes with dust proof ferrules fitted to finished floors. Our Euro cylinders give options of rear snib for keyless exiting as well as master keying.

Track Support

The fitting of structural supports is completely the responsibility of the shop fitter or builder.

Closure Weight

Closure weight starts from 6kg per square meter up to 16kg depending on infill and door type.

Track Dimensions

The ARCO Vista use an Aluminium overhead track system. Dimensions being 36mm wide by 38mm deep.

Infill Options

- UV stabilised extruded polycarbonate
- 6.38mm laminated glass
- Perforated Mesh
- Solid aluminium

Stacking Depths

Stacking Depths or Compaction can vary depending on the number of panels. The rule of thumb however is 55mm per panel

ARCO Commercial Systems continually set out to improve products through research and development and reserves the right to make changes to specifications without notice.
