

# VAC-PAC PLUS®

## FARM-PAC

NEW GENERATION WATER STABILIZER WITH DYE

[www.asp-inc.com](http://www.asp-inc.com)

*Specification Sheet*

### INDICATIONS

Vac-Pac Plus® new generation stabilizer aids in the administration of vaccines for poultry and livestock. It is especially designed to prolong the viability and improve the effectiveness of reconstituted and diluted vaccines.

### ADVANTAGES

- More concentrated formula means added convenience and less handling
- Faster wetting and improved solubility results in less time spent mixing
- Activates immediately to reduce the harmful effects of oxidizing sanitizers in the tap water, no waiting required
- Buffers water to more ideal pH
- Improves tonicity and electrolyte balance
- Blue dye provides visual assurance that the stabilizer has been added and is properly mixed. It marks the progress of the water as it fills the drinking line.
- Specially formulated to eliminate ingredients of animal origin
- Will not clog drinkers

### CAUTIONS

Not for spray, aerosol, or injectable vaccine application. This product is specifically formulated for water administration only.

Store in a cool, dry place  
Keep out of reach of children  
Not for human consumption

### PACKAGING

100 gram Jars  
40 Jars per Case  
100 Cases per Pallet

### DIRECTIONS FOR USE

Dissolve 1 gram of Vac-Pac Plus® into each 10 liters of drinking water (100 gram Jar stabilizes 1000 Liters of water). Uniform distribution of the blue dye in the water assures the stabilizer is thoroughly mixed, and the stabilized solution is immediately safe for use.
