**MucuSol®**

**CONCENTRATED LIQUID EXpectorant FOR DRINKING WATER SOLUTIONS**

**INDICATIONS**

For use in the drinking water of livestock and poultry as an aid in reducing respiratory congestion from mucus (phlegm).

**ADVANTAGES**

- Most soluble form of the premier mucolytic agent Guaifenesin
- Thins mucus, lubricates and drains respiratory tract
- Makes cough more productive
- Improves respiratory efficiency
- Reduces breathing discomfort
- Helps expel trapped irritants and infectious agents in mucus

**INGREDIENTS**

**Active Ingredient:** Guaifenesin - 128 grams/liter (3,785 mg per oz.).

**Contents:** Guam guaiac (guaiacum officinalis herbal extract), propylene glycol, water and artificial color.

**WARNINGS**

A withdrawal of 3 days in meat and 48 hours in milk are recommended. Not for human use. Keep out of reach of children.

**PACKAGING**

1 Liter (33.8 oz) bottle, 12 bottles per case.

1 Gallon (3.8 Liter / 128 oz) bottle, 4 bottles per case.

**STORAGE**

Keep container tightly closed. Protect from freezing.

**DIRECTIONS FOR USE**

MucuSol® may be added directly to the drinking water in a tank mix, or delivered in a stock solution premix through an automatic proportioner.

Mix MucuSol® into the drinking water at the rate of 100 ml for each 1000 Kg of bodyweight (1.5 ounces for each 1000 lb bodyweight).

Prepare fresh solutions daily. Repeat for 3-4 days or as necessary. Use as the sole source of drinking water.
