

Resolution to Prevent Change of Gabapentin to a Schedule 5 Category

Submitted by: Easter Seals Community Health Clinic in St Clair County

1. Whereas, many patients in home health and hospice are on gabapentin
2. Whereas, many chronic care patients are on gabapentin
3. Whereas, many patients are not on opioids

Be it resolved that ASNA recommends that DEA and many other organizations support the delay of the implementation of gabapentin being designated as a schedule 5 drug classification.
