

Product(s)	Feature	Introduced In Version/Image	Minimum Peopletools Version
Enterprise Components	Added the Delegation Framework to Enterprise Components.	FSCM 9.2 Update Image 033 (9.2.033).	
General FSCM Enhancements	Enhanced the common framework for WorkCenters. Workcenter administrators can set the grouplet to open as collapsed or expanded, display or hide the Query Manager/Viewer link, and select or deselect all the values available on the IN list for the Filter Value selection.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
General FSCM Enhancements	Enhanced FSCM applications to configure Drop Zones and enable new Grids features for Fluid pages. Drop Zones allow you to configure fluid pages to display subpages with your desired text, links, and fields, without the need to customize PeopleSoft delivered pages. Selective Fluid grids provide the ability to download grid data to Microsoft Excel, search for data in a grid column, save sort order of columns, or a combination of these features.	FSCM 9.2 Update Image 032 (9.2.032).	
General FSCM Enhancements	Enhanced the Page and Field Configurator to allow changes on secondary pages, apply configurations to multiple roles, exclude roles from configuration changes and to status configuration sequences as inactive. In preparation for the delivery of configurations to customers, this enhancement reserves sequences 81-99 for Oracle.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
General FSCM Enhancements	Delivered the PeopleSoft ChatBot related configurations and Integration Framework. More information on PeopleSoft Chatbot integration is available at https://docs.oracle.com/cd/E52319_01/infoportal/chatbot.html . Requires PeopleTools 8.57.07.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Global Components	Added the requirements to accommodate the Japanese Imperial Date format change.	FSCM 9.2 Update Image 032 (9.2.032).	
Global Components	Added the requirements for the US Federal Secure Payment System for same day automated clearing house payments.	FSCM 9.2 Update Image 032 (9.2.032).	
Purchasing	Enhanced the Supplier Profile Question feature to include a new supplier report used to search for suppliers with missing responses to required profile questions and send profile update invitations to those suppliers. If a supplier has not responded to all required profile questions, that supplier can still save the answers that they have responded. In addition, an option is available to provide a warning message if all required responses are not complete.	FSCM 9.2 Update Image 032 (9.2.032).	
Purchasing	Enhanced the Supplier Performance tile so that a reviewer can view the information in an expanded, modal window. From the expanded window, users can access evaluation details for the most recent evaluation or any evaluation that corresponds to the trending data points. These evaluation details can be viewed at the section or overall levels.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Purchasing	Enhanced the Manage Evaluations and My Evaluations features by allowing users to reopen an evaluation. For My Evaluations, the evaluator is able to reopen a submitted or omitted evaluation and make adjustments. For Manage Evaluations, the evaluation owner can reopen an evaluation to allow the evaluator to make adjustments.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Purchasing	Enhanced the Create and Copy Evaluation features by adding two new options. The first option is One-to-Many, which allows users to copy an existing supplier evaluation to any number of other suppliers, over the same period, using the same template and is evaluated by the same users. The second option is Next Period, which allows the selection of multiple source evaluations to create evaluations for the next calendar period.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Purchasing	Enhanced Supplier ScoreCarding with new supplier filtering and trace-back options for the Overall Score Trend and Overall Score Rank pages.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Purchasing	Enhanced the Purchasing dispatch process with an option to include closed line amount in the purchase order total. Additional enhancements include new email validation logic and to display the recipient email and buyer in dispatch history, dispatch report, and so forth.	FSCM 9.2 Update Image 032 (9.2.032).	
Purchasing	Enhanced the Federal Data Act File C to include the general ledger posted date field and extract the posting date for all detailed transactions.	FSCM 9.2 Update Image 032 (9.2.032).	
Purchasing	Enhanced Procurement Operations with the new Payments Analysis page. This page is used to track and analyze paid and expensed amounts against procurement contracts.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Purchasing	Enhanced the Supplier Registration feature by adding an Editor role. This provides the ability to review, update, and add Supplier and Bidder registration information prior to the approval process.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Purchasing	Enhanced the Bidder and Supplier Registration and Supplier Change Requests feature to align with available fields.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Supplier Contract Management	Enhanced the DocuSign feature by allowing attachments to be embedded into documents.	FSCM 9.2 Update Image 032 (9.2.032).	
Supplier Contract Management	Enhanced the Supplier Contract Fluid Approval feature by allowing you to view documents in PDF format.	FSCM 9.2 Update Image 032 (9.2.032).	
Supplier Contract Management	Enhanced the Adobe Sign feature by allowing attachments to be embedded into Supplier Contract documents.	FSCM 9.2 Update Image 033 (9.2.033).	
Supplier Contract Management	Enhanced the document authorization control feature. Administrators can manage and bypass approvals, and delete document privileges for all users, user document access, and user preferences.	FSCM 9.2 Update Image 033 (9.2.033).	8.56
eProcurement	Added the Delegation Framework feature for Requisition Approvals.	FSCM 9.2 Update Image 033 (9.2.033).	8.57
Asset Management	Enhanced the Disposal Worksheet feature to allow retirements by disposal code and partial disposal by cost.	FSCM 9.2 Update Image 032 (9.2.032).	
Asset Management	Enhanced net book value reporting in Asset Management to improve usability for operating leased assets. These reports were enhanced: Asset NBV by ChartField, Asset NBV by Category, and Asset NBV by Location.	FSCM 9.2 Update Image 033 (9.2.033).	
Asset Management	Enhanced the Preventive Maintenance Schedule, Mass Update feature to include the following fields for search and update: Employee ID, Crew ID, Maintenance Type, and Schedule Description. In addition, this enhancement provides a more flexible search and update for more than 300 rows at a time.	FSCM 9.2 Update Image 033 (9.2.033).	
Asset Management	Enhanced the Preventive Maintenance Schedule, Mass Update feature to include the following fields for search and update: Employee ID, Crew ID, Maintenance Type, and Schedule Description. In addition, this enhancement provides a more flexible search and update for more than 300 rows at a time.	FSCM 9.2 Update Image 033 (9.2.033).	
Asset Management	Enhanced the Preventive Maintenance Schedule, Mass Update feature to include the following fields for search and update: Employee ID, Crew ID, Maintenance Type, and Schedule Description. In addition, this enhancement provides a more flexible search and update for more than 300 rows at a time.	FSCM 9.2 Update Image 033 (9.2.033).	

Asset Management	Enhanced the Preventive Maintenance Schedule, Mass Update feature to include the following fields for search and update: Employee ID, Crew ID, Maintenance Type, and Schedule Description. In addition, this enhancement provides a more flexible search and update for more than 300 rows at a time.	FSCM 9.2 Update Image 033 (9.2.033).	
Asset Management	Enhanced the condition-based maintenance feature to receive alerts from Oracle Internet of Things (IoT) Asset Monitoring Cloud Service. The integration accelerates existing asset tracking and maintenance business process, by providing real-time visibility to an asset's location, condition, and utilization. To enable the integration, the Basic Add and Define Asset Operational Information has been enhanced to identify assets tracked in IoT Asset Monitoring.	FSCM 9.2 Update Image 033 (9.2.033).	
Asset Management	Enhanced the Copy Existing Asset feature to allow users to copy Preventive Maintenance schedules from an existing asset to the new asset.	FSCM 9.2 Update Image 033 (9.2.033).	
Asset Management	Enhanced net book value reporting in Asset Management to improve usability for operating leased assets. These reports were enhanced: Asset NBV by ChartField, Asset NBV by Category, and Asset NBV by Location.	FSCM 9.2 Update Image 033 (9.2.033).	
Billing	Enhanced Billing for the European Union VAT legislative changes	FSCM 9.2 Update Image 032 (9.2.032).	
Billing	Added the ability to update a field for multiple invoices en masse.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Billing	Enhanced the Billing electronic invoice process to support the new UBL 2.1 European Union directive on electronic invoices. The directive is for all invoicing software to comply with the electronic invoice requirement of worldwide companies invoicing the European Union governments and agencies.	FSCM 9.2 Update Image 032 (9.2.032).	
Billing	Enhanced the Billing grids to support PeopleTools fluid grid enhancements	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Billing	Enhanced the Billing Fluid Workcenter and the Billing Invoice Mass Maintenance page, to support the PeopleTools Drop Zone functionality, and to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Cash Management	Enhanced the Fluid Treasury WorkCenter, My Work area to automate the integration of accounting entries to PeopleSoft General Ledger for one or more transactions	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Deal Management	Enhanced the capabilities of creating Deal transactions by allowing customers to copy existing Deals.	FSCM 9.2 Update Image 032 (9.2.032).	
Enterprise Components	Added the Delegation Framework to Enterprise Components.	FSCM 9.2 Update Image 033 (9.2.033).	
Expenses	Enhanced the expense report feature by allowing users to edit the expense type to entries populated from My Wallet.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Expenses	Enhanced FSCM applications to configure Drop Zones and enable new Grids features for Fluid pages. Drop Zones allow you to configure fluid pages to display subpages with your desired text, links, and fields, without the need to customize PeopleSoft delivered pages. Selective Fluid grids provide the ability to download grid data to Microsoft Excel, search for data in a grid column, save sort order of columns, or a combination of these features.	FSCM 9.2 Update Image 032 (9.2.032).	8.57
Expenses	Added the GPS mileage calculator, which is a map-based solution that automatically calculates distance by capturing points on a map. When a distance is calculated, expense users can associate the trip to a mileage reimbursement rate for mileage reimbursements.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Expenses	Added the Delegation Framework feature for Travel and Expense Approvals.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
General Ledger	Enhanced Entry Event functionality to handle upward and downward adjustments to prior year obligations for unexpired funding.	FSCM 9.2 Update Image 033 (9.2.033).	
General Ledger	Enhanced ChartFields to 21 fields and to align with North America Payroll (PNA)	FSCM 9.2 Update Image 033 (9.2.033).	
General Ledger	Enhanced the Fluid Simply Journal feature. Users can copy simple journals and simple journal templates, use document sequencing, and VAT.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Global Components	Added the requirements to accommodate the Japanese Imperial Date format change.	FSCM 9.2 Update Image 032 (9.2.032).	
Global Components	Added the requirements for the US Federal Secure Payment System for same day automated clearing house payments.	FSCM 9.2 Update Image 032 (9.2.032).	
Global Components	Enhanced VAT default subpages so that they are available in the PeopleSoft Fluid user interface.	FSCM 9.2 Update Image 033 (9.2.033).	8.54
Lease Administration	Enhanced Lease Administration to enable you to add, track, and process exempt leases (short-term leases) using the new Exempt from Recognition option. Exempt leases are not capitalized.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Lease Administration	Enhanced Lease Administration to enable you to activate multiple leases at once by business unit, lease obligation type, and lease number.	FSCM 9.2 Update Image 032 (9.2.032).	
Payables	Enhanced the US Federal Secure Payment System for same day automated clearing house payments.	FSCM 9.2 Update Image 032 (9.2.032).	
Payables	Enhanced the payment request feature by adding the Payment Address field in the Supplier Information page. In addition, an option to edit the supplier payment address is available while creating or updating payment request transactions.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Payables	Enhanced the voucher maintenance feature so that users can add or edit comments to vouchers using the voucher maintenance component.	FSCM 9.2 Update Image 032 (9.2.032).	
Payables	Added to the Update Dates on Run Control feature to change date fields for multiple Account Payable Run Controls. This is accomplished without having to go to each Run Control individually. See Update Run Control As of Date feature, bug 28823213.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Payables	Added a Copy Voucher feature in the Payables Voucher Search page. This allows users to copy existing voucher information when creating a new voucher. Additional enhancements include Use Tax on the Voucher's Sales and Use Tax Summary, a 1000 separator on the voucher payment, a Ship To field on the Voucher Maintenance page, and an Approver Status option on the Voucher Mass Maintenance page.	FSCM 9.2 Update Image 033 (9.2.033).	
Payables	Added the Delegation Framework feature for Payment Requests.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Project Costing	Enhanced the data compression feature in the Classic user interface. A pagelet is available in the Projects WorkCenter where users can review and select projects for compression. Administrators have been given a super user role for project compression.	FSCM 9.2 Update Image 032 (9.2.032).	
Project Costing	Enhanced the data compression feature in the Fluid user interface. A Project Compression interface allows users to get an estimate of the compression process output that helps them to configure the actual compression values. Users can also identify projects that are ready for compression.	FSCM 9.2 Update Image 032 (9.2.032).	8.55
Receivables	Enhanced the Payment Predictor feature by improving the hit rate. The system now includes all customers in the customer hierarchy.	FSCM 9.2 Update Image 032 (9.2.032).	
Receivables	Enhanced the Receivables Fluid WorkCenter grids to support PeopleTools fluid grid enhancements. This is the main project for Fluid WorkCenter grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55

Receivables	Enhanced the grids on the Customer Inquiry pages for the Customer Comprehensive View feature to support PeopleTools Fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Receivables	Enhanced the Receivables Fluid CCV to support PeopleTools Drop Zone functionality. This is the main project for Fluid CCV Drop Zone enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Receivables	Enhanced the fluid pages in the Receivables product to support the PeopleTools Drop Zone functionality.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
Resource Management	The Resource Optimization feature has been deprecated in PeopleSoft FSCM image 32.	FSCM 9.2 Update Image 032 (9.2.032).	
eBill Payment	Enhanced the eBill Payment Account Summary grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eBill Payment	Enhanced the eBill Payment Administer User grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eBill Payment	Enhanced the eBill Payment Contact Us grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eBill Payment	Enhanced the eBill Payment Cart grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eBill Payment	Enhanced the eBill Pending Payments grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eBill Payment	Enhanced the eBill Payment Quick Pay grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eBill Payment	Enhanced the eBill Payment History grid to support PeopleTools fluid grid enhancements.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
eSettlements	Enhanced the Fluid Self Service Invoice (SSI) feature in eSettlements to display UPN (Universal Product Number) fields and UPN details.	FSCM 9.2 Update Image 033 (9.2.033).	8.55
