

TRIBAL ISAC

INFORMATION SHARING & ANALYSIS CENTER

Dear _____,

I am requesting approval to join the Tribal-ISAC (Information Sharing & Analysis Center) security community. Cyber attacks at tribes and tribal enterprises are on the rise. It's something we see continuously in the news and a challenge we face every day. Our tribe and its enterprises need to take advantage of every available, valuable and reasonably priced resource to protect itself, and I believe membership in the Tribal-ISAC community can improve our preparedness and cybersecurity posture, potentially helping to shield us from future threats.

ISAC's are effective and already exist for many industries, but sovereign tribes and their enterprises have not fit into any one of them - until now. Tribal-ISAC is a national non-profit tribal community that can strengthen our security posture in many ways. For example, they remove much of the guesswork out of combing through the overwhelming amounts of global cybersecurity data we receive by funneling it down to a consumable **relevant and specific daily information report that is most important for tribal IT teams.**

Members of the Tribal-ISAC have come together as a nationwide community of tribal industry peers, pooling their combined expertise, resources and communication between one another to bring timely awareness of potential threats, trends, and solutions that help to better protect all Tribal-ISAC Member enterprises and organizations. As a member, they would assist us with awareness, preparedness and access to more security resources, while also providing access to a trusted and secure sharing platform. The Tribal-ISAC provides a better platform for members to improve and manage security related interaction and access to federal, state and local organizations and agencies. In the event of a crisis or security incident, the Tribal-ISAC could serve as a crucial resource for us. They offer us greater access to industry expertise and guidance as well as feedback and support from security experts and peers across the country.

Each tribe gains more than just valuable, secure and anonymous security information sharing through a Tribal-ISAC Membership. As soon as we become members, we will *immediately* gain access to new security resources and services. Some of the direct member benefits include:

- Access to the secure and trusted Collaboration Portal and Tribal-ISAC Platform
- Opportunity to receive automated (tribal specific) threat information feeds daily/weekly
- Access to Tribal-ISAC created webinars and training/education
- Sharing of industry leading practices
- Access to security-minded peers from tribes across the nation for collaboration
- Teleconferences and webinars provided by Tribal-ISAC's shared dedicated security analysts
- Critical threat bulletins and advisories
- TribalHub Membership and discounts on all Tribal-ISAC and TribalHub events
- Access to new security resources obtained by Tribal-ISAC through shared funding model
- Access to information received from Tribal-ISAC's federal, state and commercial information sharing partners

Ever increasing threats and breaches in tribal government, health and enterprises, including casinos, have proven costly and devastating. No tribe or tribal enterprise is immune from these growing threats, and we are certainly not safer working alone.

Attached is an informational sheet along with pricing structure and you can find more information including a video at www.tribalisac.org. I am requesting that we move forward with a _____ membership, which will cost us only _____ - a small investment for the value expected and in relation to the valuable tribal resources we are working to secure.

Upon your approval, I will secure our membership and we can begin receiving these benefits. Thank you for your consideration of this request.

Sincerely,

If your tribe is concerned about cyber security and the increasing costly breaches we are seeing nationwide affecting tribes, tribal health and tribal gaming & hospitality, you need to become a member of the newly formed non-profit Tribal-ISAC group.

Become a member of this safe, trusted and secure tribal security information sharing community and you can join the conversation in the Tribal-ISAC group located on the Tribal community site.

TRIBAL-ISAC ANNUAL MEMBERSHIP
