2. Income Calculation

Current income must be at or below 80% AMI. Income includes all adult (18 years and older) household members and unearned income attributable to a minor. A household is one or more individuals seeking assistance together. Provider must calculate the household's total gross income for calendar year 2020 **or** the household's current monthly income at the time of application.

If income is a fixed amount (TANF, SSDI, etc.), multiply the gross monthly amount by 12 to determine annual income.

If income is not at a fixed amount each month, (TANF, SSDI, etc.) determine the average over the last 60 days by using the following method: $\$(60 \text{ days of total income})/2 = \text{Average income} \times 12 \text{ months} = \text{Annual income}$

Household name/ household members	Source of Income <i>(see income types below)</i>	Gross Income in a pay period	Calculation method	Annual Income
