I would like to help with my contribution of _____ or a In-Kind Donation. Name on Sponsor Banner, Website and Facebook

Josh's Journey

For the last 10 plus years, Brain Injury has been the life of the Morros Family, as they not only research and read about it, They LIVED IT! Unfortunately, Josh tragically and suddenly passed away on December 24, 2017. We continue with the Because I Can Annual Tournament honoring Josh Morros and his legacy.

In 2008, Josh Morros, founder of Because I Can, suffered a traumatic brain injury where he was on life support and in a coma for 24 days. Josh had an amazing recovery that consisted of a unique platform designed by himself and his mother. That platform was a key component with his recovery success and being a role model to others sustaining concussions, brain injuries or having neurological conditions.

This is where B.R.A.I.N Nevada (Brain Recovery Assistants Institute of Nevada) evolved and now has a program that can help survivors, family and caregivers dealing with brain injuries. BRAIN is a step in the right direction, they we will coach by empowerment, enhancement in a therapeutic environment thru 1.) Exercise, 2.) Nutrition, 3.) Sleep 4.) Self-Development. BENEFITS of a program like BRAIN: Improved muscle and skeleton function and integrity, support cognitive function, facilitate neuroplasticity, control weight, combat illness, decrease fall risk, improve mood, boost energy, better sleep habits, build community/social participation and BUILDS CONFIDENCE. Brain Injury is a devastating injury and effects every family differently, BUT it doesn't mean individuals have to settle for existing verses enhancement.

The Morros Family will continue with Josh's mission and passion in the community, where Josh's attitude and desire was to put more "CAN" verses "CAN'T in the possibilities after sustaining a concussion, brain injury or neurological condition. To help support the program or get more information about Because I Can and BRAIN NEVADA, visit www.brainnevada.com.

MILLIONS ARE LIVING WITH THE EFFECTS OF A BRAIN INJURY

(some don't even know it)

**Not Every Disability Can be Seen.
Brain Injury is America's Largest
Invisible Disability.**

**Ask 3.5 Million Americans Who
Sustain a TBI Every Year.**

NUTRITION FOR A BRAIN INJURY

Patients who survive a traumatic brain injury often face a long and challenging road to recovery as they work to restore normal vocal, ambulatory and bodily functions. Nutrition is crucial both immediately after injury and throughout the rest of your life if you have had a brain injury. Long-term management of a brain injury involves providing your body with the materials it needs to function optimally.

DID YOU KNOW?

- A person with a brain injury is a person first
- A concussion is a brain injury—90% don't even lose consciousness?
- No two brain injuries are exactly the same
- 2.4 Million, including 475,000 children sustain a brain injury each year
