How to Make A Toilet Paper Roll Pot

**Things you'll need:**
- Toilet paper roll
- Scissors
- Soil
- Watering can
- Sunlight

1. Flatten your toilet paper roll and fold in half lengthwise.
2. Unfold the toilet paper roll. Your circle roll should now look more like a square.
3. Cut a 1/2 inch slit on each crease at the end of your roll, creating four flaps.
4. Fold one flap inward. Working clockwise, fold the other flaps in.
5. Fold the corner of the last flap under the first flap. This creates the bottom of your pot.

- Fill half of your newly made pot with dirt or potting soil.
- Place a seed in the pot and add more soil on top so your seed is fully covered.
- Water your seed until soil is damp.
- Place on a plate in a sunny window. When the seed sprouts, plant in a bigger pot or in the ground.
