

Hydro-Gardens

(719) 495-2266

Rollerplast (5E116B) & (5E116S)

Operating Instructions

Hydro-Gardens now offers the ROLLERPLAST. This latest addition to our range of greenhouse products is suitable for one or two growing seasons. Each replaceable spool, has 15 meters (50 Feet) of twine. Especially easy and comfortable to use, the RollerPlast's attractive price also provides our customers with an economic alternative to existing methods. Make sure the twine is routed correctly (Fig 1). While there is tension on the line, the spool will not unwind. To lower your plants, lift the twine and pull toward the back to the body (Fig. 2). When you have the right amount of twine released, let the twine go and the tension on the twine will hold it in place.
