

# ERTELALSOP

THE FIRST NAME IN LIQUID FILTRATION™

## EA 102 & EA 203

The EA 102 and EA 203 lab filter presses are among the most efficient and cost effective means of liquid/solid separation through pressure filtration. EA Lab presses provide a simple reliable method of high compaction pressure to compress and dewater solids concentration. This provides clearer filtrate solutions than systems that only remove free water.

This series of filters is designed for the laboratory, new product and process development, testing, scale-up and small volume production of products. Cloth or paper changeover can be accomplished easily and in a minimum of time.
