DIY BEAN BAGS
Museum of Craft and Design

MATERIALS

• 3-6 standard sized balloons
  (find these in the floral section of your grocery store)
• Rice
• Measuring spoons
• Funnel*
• Scissors

INSTRUCTIONS

1. Stretch the balloon out by blowing up one time, then deflate
2. Put balloon opening onto funnel
3. Measure 3 tablespoons of rice into funnel/balloon
4. Remove funnel
5. Tie balloon low on the neck, pushing most of the air out.
   It's OK if there is a bit of air remaining.
6. Make sure your knot is super tight, then snip off the balloon end about ¼ inch from the knot.

*Need a funnel, too? Cut a piece of thin cardboard from your recycling—food packaging works best. Roll the cardboard into a cone, leaving a ½ inch opening. Tape the sides and voilà—you have a quick funnel.
