

Box S Fence Travel Panels

We have all heard stories of horses getting loose at the rodeo grounds or trail camp, perhaps this has happened to you. Protect your equine investment with the **Box S Fence Travel Panels**. These panels are a light weight, yet strong panel that will keep your horse close by your trailer when you are on the road.

Designed to store in the front stall of most slant load trailers, they are also light enough to put on top of your hay rack. Set up your camp to fit the area available, four settings allow you to expand the panel from 7' 2" out to 11' 4" in length. The panel has four bars and a top rail height of 54 inches, to help stop the reaching for grass. They are light weight at just 38 pounds, less than four gallons of milk!!!

Give us a call and let Box S Fence build a set for you.
