

Asset Allocation

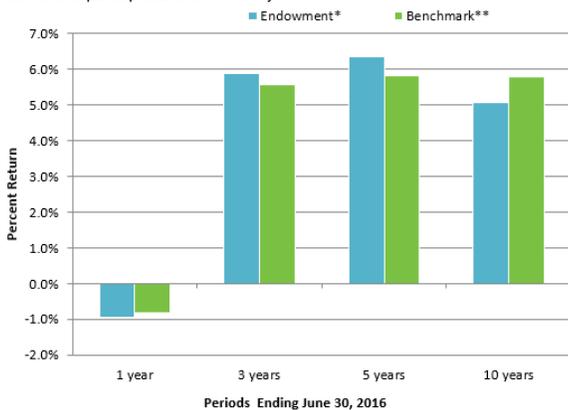

As fiscal year 2016 came to a close, the Foundation's Endowment remained broadly diversified across equity, fixed income, and alternative investments. Nearly 66% was invested in mutual funds containing equities (i.e., stocks) with exposure to international markets and various investment styles. Approximately 18% of the Endowment was positioned in mutual funds containing fixed income (i.e., bonds) securities and cash, and the remainder of the portfolio was invested in mutual funds containing alternative assets, such as real estate, energy, natural resources and commodities.

Performance

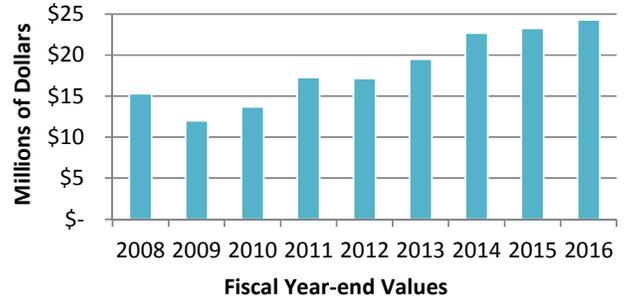

Performance of the Endowment in fiscal year 2016 (-0.93%) slightly underperformed the benchmark (-0.83%), but continues to perform well over the longer term time periods. FY 2016 performance benefited from exposure to global real estate and international bonds. International large cap equities underperformed during FY 2016, as did commodities during the latter part of 2015. However, energy and commodities did recover somewhat in the first half of 2016 and have served a role towards diversification and total return in previous years. The Foundation remains confident it is investing to both preserve and grow the Endowment for the long-term.
