AGGR Weight Management & Control Formula

AGGR is a vegetarian and gluten-free dietary supplement that supports weight management.*

AGGR combines four ingredients that work together to accelerate, maintain, and break through weight loss barriers.*

**AGGR Supports:**
- Thermogenesis
- Fat burning hormones Leptin and Adiponectin
- Healthy blood sugar levels and reduced cravings
- Appetite Control
- Proper fat metabolism

**About The Ingredients:**

**African Mango** (Irvingia gabonesis) is a fruit found and grown in West Africa. The extract derived from the seed has been shown to support weight management through appetite suppression and increased metabolic rate. It works to slow body fat production by supporting favorable changes in Glycerol-3 Phosphate, Leptin and Adiponectin which supports reduction of the conversion of complex carbs into sugars, fat burning and hunger management.

**Raspberry Ketone** is a compound that produces the smell in raspberries. It supports the weight loss process by supporting the body’s ability to produce Adiponectin, a hormone that increases metabolism, reduces fat cell size, and modulates a number of metabolic processes, including glucose regulation and fatty acid catabolism. Adiponectin is exclusively secreted from the adipose tissue and supports weight management via the brain similar to the action of Leptin, a hormone produced in adipose tissue that increases metabolism and supports appetite control.

**Green Coffee Bean Extract** provides antioxidant activity and supports metabolism in order to burn higher proportions of lipids (fat) to carbohydrates. Green Coffee Bean Extract contains two important polyphenolic compounds—caffeic and chlorogenic acids. Caffeic acid provides a safe energy boost while being naturally low in caffeine. Chlorogenic acid helps to slow the release of glucose into the blood stream and reduces the absorption of dietary fat.

**Green Tea Extract** is an excellent source of potent polyphenolic compounds (bioflavonoids with powerful antioxidant properties). Research has identified EGCG as the most powerful active polyphenolic compound in Green Tea that supports thermogenesis (fat burning), healthy blood insulin levels and appetite control. The Green Tea Extract used in our product is standardized to contain 70% EGCG per capsule!
