

## ALLIANT ENERGY CORPORATION

Electric & Gas AMR Installation

### PROJECT DESCRIPTION & SCOPE

In 2008 Alliant Energy Corporation in Wisconsin and Iowa, contracted with VSI Meter Services, Inc. (now Grid One Solutions, Inc.) to perform 1.038 million electric and 450,000 gas AMR meter installations. Sensus was the meter technology utilized to support this automation effort. As of July 2010, the Wisconsin project completed 688,000 endpoint installations with a contract extension to December 2010 for 40,000 gas meter maintenance work orders. The Iowa project is estimated to commence in the first quarter of 2012 for the installation of 535,000 electric and 265,000 gas meters.

### PROJECT GOALS

The project's goals were to reduce costs and improve meter reading efficiency and accuracy.

### SERVICES PROVIDED BY GRID ONE

- ▶ Remove old and install new electric meters
- ▶ Remove old and install new gas meters
- ▶ Sensus meter technology was implemented

### PROJECT RESULTS

The Grid One team completed the Wisconsin AMR project on budget and on schedule. The Iowa project is on track to start in 2012.
