

HOW TO MEASURE YOUR TRUCK BED

- Your truck bed length is determined by the distance between the **INSIDE** of your closed tailgate and the **INSIDE** of the bulkhead.
- With the tailgate down, measure from the **INSIDE** of the bulkhead to the end of the truck bed itself. **DO NOT INCLUDE THE TAILGATE OR THE GAP BETWEEN THE BED AND TAILGATE.**
- **OR:** With the tailgate closed, measure from the **INSIDE** of the bulkhead to the **INSIDE** of the closed tailgate.
- Convert the measurement into feet.
- Remember: Advertised bed lengths are sometimes rounded from the actual bed length.
