

MIRANDA FETAHU

As a child, Miranda's mother encouraged her development in the arts. This love of the arts grew from Miranda entering art shows and face painting at festivals to her wanting to encourage other young girls and women, the way that her mother had encouraged her, developing the concept that women need to be our motivation and not our competition. Through collaborations and hard work, she has successfully been able to support other women with their creativity through the power of nails.

Within a year of becoming a manicurist, Miranda has developed a committed following due to her clean and precise work, crossing over her artistic talents to miniature works of art. When creating a manicure set, Miranda is most notable in her colorful abstract designs. Her work has provided the opportunity to be featured in multiple commercials in close up hand shots.

Through her work, she is able to take inspiration and make it come to life at her client's fingertips. She has spent many hours researching global works of nail art in order to bring the most current techniques to her sets by only using gel application and airbrushing. The gel application is a modern approach to the acrylic application, leaving little to no damage to the natural nail bed. Her airbrushing skills allow pre designing and quick nail set changes when working on production sets. She is also trained in Russian Manicuring, allowing for those close up shots without any worry of dry and/or overgrown cuticles.

Aside from being a full time manicurist, Miranda is also a long time digital textile designer, creating colorful fabrics for both hobbyists and small business owners.

Clients love Miranda's upbeat attitude and warm presence when working on nail sets, creating a space for clients where their only focus is how they feel once their nails are complete. She believes in the uniqueness that we all hold inside and Mother Nature surrounds us with. She expresses that manicures are not just a way to pamper yourself, but a way to tell the world who you are.
