DELPHI ENERGY CORP. ANNOUNCES CREDITOR APPROVAL OF PLAN OF COMPROMISE AND ARRANGEMENT

CALGARY, ALBERTA – September 9, 2020 – Delphi Energy Corp. (“**Delphi**” or the “**Company**”) is pleased to announce that, at creditors’ meetings (the “**Meetings**”) held today, Delphi’s creditors approved the previously announced plan of compromise and arrangement (the “**Plan**”) of the Company, Delphi Energy (Alberta) Limited and Delphi Energy Partnership under the *Companies’ Creditors Arrangement Act* (Canada) (“**CCAA**”) and the *Canada Business Corporations Act*.

Approval of the Plan

At the Meetings, 100% of the votes cast by beneficial holders of Delphi’s senior secured notes, voting as a class, and 76% of the votes cast by general unsecured creditors (excluding creditors holding disputed claims or claims that were submitted after the claims bar date, which do not affect the result of the vote), voting as a class, were voted in favour of the Plan. In each case, a majority in number of creditors who voted in such class voted in favour of the Plan.

Detailed voting results for the Meetings are available under Delphi’s profile on SEDAR at www.sedar.com.

Court Approval and Implementation

A hearing to seek an order of the Court of Queen’s Bench of Alberta (the “**Court**”) sanctioning the Plan under the CCAA, among other things, is currently scheduled for 9:00 a.m. (Calgary time) on September 11, 2020, or such other date as may be set by the Court and posted on the monitor’s website listed below. Subject to obtaining Court approval of the Plan and the satisfaction or waiver of the other conditions to the implementation of the Plan, the Company is working to implement the Plan in mid-September 2020.

Additional Information

Delphi and certain of its subsidiaries were granted an initial order and protection under the CCAA on April 14, 2020. PricewaterhouseCoopers Inc. has been appointed by the Court as monitor in the CCAA proceedings. Materials publicly filed in the CCAA proceedings, including copies of the initial order of the Court, are available on the monitor’s website at <http://www.pwc.com/ca/delphi>. Delphi will continue to provide updates regarding its restructuring as developments warrant.

About Delphi Energy Corp.

Delphi Energy Corp. is a junior E&P producer of liquids-rich natural gas. The Company has achieved top decile operational results through the development of its high quality Montney property, uniquely positioned in the deep basin of northwest Alberta. Delphi continues to improve its operational efficiencies through the development of its dominant land position at Bigstone. Delphi is headquartered in Calgary, Alberta.

Forward-Looking Statements. *This news release contains forward-looking statements and forward-looking information within the meaning of applicable Canadian securities laws. These statements relate to future events or the Company's future performance and are based upon the Company's internal assumptions and expectations. All statements other than statements of present or historical fact are forward-looking statements. Forward-looking statements are often, but not always, identified by the use of any of the words "expect", "anticipate", "continue", "estimate", "may", "will", "should", "believe", "intends", "forecast", "plans", "guidance", "budget" and similar expressions.*

More particularly and without limitation, this release contains forward-looking statements and information relating to implementation of the Plan and the timing thereof. The forward-looking statements and information contained in this release are based on certain key expectations and assumptions made by Delphi. The following are certain material assumptions on which the forward-looking statements and information contained in this release are based: satisfaction of all conditions to implementation of the Plan; the timely receipt of required Court approvals; the ability of the Company to operate in the ordinary course during the CCAA proceedings, including with respect to satisfying obligations to service providers, suppliers, contractors and employees; the ability of the Company to continue as a going concern; the Company's future liquidity position, and access to capital, to fund ongoing operations and obligations; the ability of the Company to stabilize its business and financial condition; the ability of the Company to implement and successfully achieve its business priorities; the ability of the Company to comply with its contractual obligations, including, without limitation, its obligations under debt arrangements; the general regulatory environment in which the Company operates; the tax treatment of the Company and the materiality of any legal and regulatory proceedings; the stability of the global and national economic environment, the stability of and commercial acceptability of tax, royalty and regulatory regimes applicable to Delphi, exploitation and development activities being consistent with management's expectations, production levels of Delphi being consistent with management's expectations, the absence of significant project delays, the stability of oil and gas prices, the absence of significant fluctuations in foreign exchange rates and interest rates, the stability of costs of oil and gas development and production in Western Canada, including operating costs, the timing and size of development plans and capital expenditures, availability of third party infrastructure for transportation, processing or marketing of oil and natural gas volumes, prices and availability of oilfield services and equipment being consistent with management's expectations, the availability of, and competition for, among other things, pipeline capacity, skilled personnel and drilling and related services and equipment, results of development and exploitation activities that are consistent with management's expectations, weather affecting Delphi's ability to develop and produce as expected, contracted parties providing goods and services on the agreed timeframes, Delphi's ability to manage environmental risks and hazards and the cost of complying with environmental regulations, the accuracy of operating cost estimates, the accurate estimation of oil and gas reserves, future exploitation, development and production results and Delphi's ability to market oil and natural gas successfully to current and new customers. Additionally, estimates as to expected average annual production rates assume that no unexpected outages occur in the infrastructure that the Company relies on to produce its wells, that existing wells continue to meet production expectations and any future wells scheduled to come on in the coming year meet timing and production expectations.

Although the Company believes that the expectations reflected in such forward-looking statements and information are reasonable, it can give no assurance that such expectations will prove to be correct and such forward-looking statements should not be unduly relied upon. Since forward-looking statements and information address future events and conditions, by their very nature they involve inherent known and unknown risks and uncertainties. Delphi's actual results, performance or achievements could differ materially from those expressed in, or implied by, these forward-looking statements and, accordingly, no assurance can be given that any of the events anticipated by the forward-looking statements will transpire or occur, or if any of them do so, what benefits Delphi will derive therefrom. Should one or more of these risks or uncertainties materialize, or should assumptions underlying forward-looking statements prove incorrect, actual results may vary materially from those currently anticipated due to a number of factors and risks. These include, but are not limited to, the risks associated with the oil and gas industry in general such as operational risks in development, exploration and production, delays or changes in plans with respect to exploration or development projects or capital expenditures, the uncertainty of estimates and projections relating to production rates, costs and expenses, commodity price and exchange rate fluctuations, marketing and transportation, environmental risks, competition from others for scarce resources, the ability to access sufficient capital from internal and external sources, changes in governmental regulation of the oil and gas industry and changes in tax, royalty and environmental legislation. Additional information on these and other factors that could affect the Company's operations or financial results are included in the Company's most recent Annual Information Form and other reports on file with the applicable securities regulatory authorities and may be accessed through the SEDAR website (www.sedar.com).

Readers are cautioned that the foregoing list of factors is not exhaustive. Furthermore, the forward-looking statements contained in this release are made as of the date of this release for the purpose of providing the readers with the Company's expectations for the coming year. The forward-looking statements and information may not be appropriate for other purposes. Delphi undertakes no obligation to update publicly or revise any forward-looking statements or information, whether as a result of new information, future events or otherwise, unless so required by applicable securities laws. The forward-looking statements contained in this release are expressly qualified in their entirety by this cautionary statement.
