

## BRUNSWICK EXPLORATION ANNOUNCES MULTIPLE COPPER-GOLD-SILVER DISCOVERIES AT THE FUNDY GOLD PROJECT

**Montreal, June 1 2021 – Brunswick Exploration Inc.** (“BRW” or the “Company”) is pleased to announce multiple polymetallic vein discoveries within the Fundy Gold Project, located near the City of Saint John, New Brunswick. Discoveries are located in between the Spruce Lake Shear Zone and the Kennebecasis Fault (see [Map](#)). Highlights outcrop grab samples from the Lindy Lake are:

- **12.05% Cu, 0.31 g/t Au and 63.8 g/t Ag;**
- **8.79% Cu, 0.43 g/t Au and 70.7 g/t Ag**
- **1.08% Cu, 0.56 g/t Au and 290.0 g/t Ag**

Mr. Killian Charles, President of BRW, commented: “We are very pleased to announce today’s results in another prospective area of the Fundy Gold Project. The high copper and silver tenor of these new discoveries is exciting and we look forward to continued prospecting over the summer months. These results are distributed over a strike length of roughly 16 kilometers in between two large property scale structural features. Our technical team is starting to uncover the potential for multiple mineralizing events and will evaluate the possibility of intrusion related as well as Iron-Oxide-Copper-Gold (IOCG) mineralization in the Lindy Lake and Shadow Lake area. I would also like to personally thank the staff of the New Brunswick Government’s Natural Resources and Energy Development team who have been instrumental in providing valuable field observations, site visits and academic literature.”

All grab samples are from outcrop exposures along road ways or in quarries. Highlights of the four discoveries are:

Table 1: Grab Sample Highlight

Discovery	Sampe ID	Cu %	Au g/t	Ag g/t
Lindy Lake North East Pit	665211	12.05	0.31	63.80
Lindy Lake North East Pit	665208	8.79	0.43	70.70
Lindy Lake North East Pit	665207	5.09	0.06	23.10
Lindy Lake North East Pit	665209	4.36	0.19	37.20
Lindy Lake South East	665195	3.45	0.18	42.80
Lindy Lake South East	663951	3.44	1.47	112.00
Lindy Lake South West	665196	1.08	0.56	290.00
Lepreau Exit South	663952	1.69	0.12	5.83
Lepreau Exit South	665201	1.26	0.11	3.20

### Lindy Lake Overview

The discoveries are from grab samples located in close proximity to the Spruce Lake Shear Zone and are hosted in quartz carbonate veins or massive sulphide lenses within the Perch Lake Granodiorite. The Lindy Lake area is located roughly 1 kilometre East of the Shadow Lake Discovery (see Press Release dated October 27<sup>th</sup> 2020) and roughly 1.5 kilometres West of the Menzies Lake Discovery (see Press Release dated May 13 2021). The three Lindy Lake Discoveries are roughly 0.5 to 1.3 kilometers from one another and were found along road cuts or in quarry pits.

## Lepreau Exit Overview

The grab sample discovery is located South of the regional Kennebecasis fault and is hosted along a slip / fracture plane in contact with a felsic dyke. This mineralization is hosted within the Pocologan Harbour Suite granite (separate from the Pocologan Metamorphic Suite) and is near the McCarthy Point granodiorite. The sample was taken along a road cut and is roughly 2 kilometres north of the Little Lepreau discovery (see Press Release dated October 27<sup>th</sup> 2020).

Table 2: Grab Sample Highlight Location

Discovery	Sampe ID	Easting	Northing
Lindy Lake North East Pit	665211	713779	5010097
Lindy Lake North East Pit	665208	713784	5010176
Lindy Lake North East Pit	665207	713786	5010172
Lindy Lake North East Pit	665209	713784	5010178
Lindy Lake South East	665195	713698	5009211
Lindy Lake South East	663951	713695	5009204
Lindy Lake South West	665196	713287	5008894
Lepreau Exit South	663952	699963	5006558
Lepreau Exit South	665201	699962	5006556

## Qualified Person

The scientific and technical information contained in this press release has been reviewed and approved by Mr. Charles Kodors, P. Geo, Manager New Brunswick of Brunswick Exploration.

## About Brunswick Exploration

The Company, formerly Komet Resources Inc. is a Montreal-based mineral exploration venture listed on the TSX-V under symbol BRW. The Company is focused on exploration and development of gold and base metal properties in Eastern Canada. Current projects include gold-polymetallic vein systems in Southern New Brunswick (Fundy Gold Project), the Lac Édouard nickel-copper project in Québec, base metals VMS in the Bathurst Camp in northern New Brunswick and in the Chibougamau region of Quebec (Waconichi).
