

*10. Does GJB Health Services treat children or pre-teens?*

Yes, we do. Kathleen enjoys working with children, as does Korah. Dr. Bannasch also treats children with Movement Disorders (Parkinson's disease, Tourette's syndrome, etc.), seizures, developmental and genetic abnormalities, and migraine headaches. Teens and adults with these issues are also treated by Dr. Bannasch.

*11. Are Anger Management Classes offered?*

When the demand is there, we do. Please call us if you or a loved one has the need for this class/group. Also, if clients are court ordered to undergo Anger Management counseling, or an attorney suggests treatment, GJB Health Services will be happy to work with clients, make calls or write reports. Consulting directly with attorneys, giving depositions or giving testimony in court are all services which are provided.

*12. Is couple's counseling offered?*

Working with couples (married, dating, pre-marital, cohabitating or same sex) is an area of expertise and passion for the GJB Health Services Counseling team. Gloria Bannasch is Wisconsin's only Certified Gottman Therapist.
